DESCRIPTION

AND TECHNICAL CHARACTERISTICS

Description of the product offered /

- Table tops made of 25mm particle board. thick, bilaminated finish (made with PEFC certification). Finish to choose from all our designs.

- Optionally they can be served in: .1

Laminated finish on chipboard (HPL) .2 Phenolic (COMPACMEL)

.3 Varnished natural wood

veneer on chipboard. • 2mm PVC/ABS straight edges. thick applied

with hot melt glue (100% recyclable) with all edges rounded with a 2mm radius. Optionally, rounded edges can be used. • Optionally, it can incorporate an anti-shock edge through a profile embedded in the edge that

Protects from impacts when joined together (see detail photo).

- The cover may have a cable gland hole with a decorative cover or a TOP ACCESS (metallic or plastic) located in the place indicated by the property and in the chosen finish.
- Structure formed by two legs in the shape of an inverted "Y", made of 100x30x2mm steel tube. thick finished in aluminum, black or white epoxy paint. • Each leg incorporates two high-resistance wheels with brakes and a 60mm diameter. • Once folded the distance from wheel to wheel is close to 250mm. • The legs are joined together by a central crossbar to give rigidity to the whole. Made of 40x40x2mm steel tube. thick and finished in aluminum, black or white epoxy paint. • Folding envelopes 90° by simply operating the system incorporated in the upper part of the

The paws.

- Tables prepared to be stacked vertically and for easy handling or transport anywhere. of their positions.

- Legs provided with stacking protectors to avoid damaging table tops when stacking them. •

Optionally, you can incorporate quick-connect fittings using "click" made of high-quality polyamide. black color.

- Coating of the metal parts in epoxy powder paint with 80 microns after phosphating.

Antioxidant, guaranteeing 200 hours of salt fog. Characteristics: .1

Resistance to chemical agents for domestic use UNE 48027:1980 5 (24H), 4 (72H). .2 Resistance to mechanical damage: UNE-EN ISO 2409:2007 Classification: 0. .3 Fall of a

mass: UNE-EN ISO 6272-1:2004, at 500 mm without cracking. .4 Resistance to

humidity: UNE-EN ISO 6270-1:2002 without alteration. .5 Accelerated

aging: UNE EN ISO 11507:2007 24H loss of gloss

- Joining the board to the structure using "metal to metal" joints.

- The structure complies with the following

regulations: .1 Regarding dimensions: EN 527-1:2000 Aptd

3,4,5. .2 Regarding safety requirements: EN 527-2:2002 Aptd 3,4 .3

Regarding mechanical tests: EN 527-3:2003 Aptd 6.1 to 6.6.

- It can incorporate a folding front skirt in the same finish as the 19mm table. thick, attached to the support structure using folding clamping brackets. The skirt can also be metallic. • It can incorporate a metal electrification channel to collect cables. This is attached to the support structure and is placed along the board. Made of 1 mm steel sheet. They come in different sizes and single or double for seats in BENCH format.
- In addition, to raise cables from the ground to the electrification channel, a plastic cable gland profile (vertebra), a totem made of aluminum profile or a metal accessory finished to match the structure.
- There are socket boxes prepared to be attached or embedded in the different tables in the series.

3/

NORMATIVE

Regulations that comply (Appendixes are attached)

- ISO 9001 quality certificate
- ISO 14001 Environmental Certificate
- TECNALIA quality mark certificate.
- TECNALIA product certificate.
